

# PROGRAM MANAGEMENT (ER-PGM) (2 days, 16 hours, 16 PDUs)

Program Management is maturing as a standardized way of working. In this course you will learn about the most important theories and standards, as well as how to implement program management based on the standards, the project management model XLPM (PROPS-C) and real experiences. The course also explains when and how to apply program management to ensure an efficient use of the resources available and to facilitate the overall project portfolio management.

## AFTER THE COURSE YOU WILL

- ❖ Know what a program is
- ❖ Know the lifecycle of a program
- ❖ Why management by programs sometimes is a better option, than normal project management or ongoing operations
- ❖ How to establish, manage and document a program
- ❖ How to manage and steer projects within a program

## TRAINING METHODS

We apply a training method based on "learning by doing". This means optimizing your learning by combining the trainer's input with your own experience and active participation.

The course is aligned with the *PMBOK® Guide* and the PMI® Standards; Program Management, Portfolio Management and Project Management.

*Optional: Combine with the book GPMM 3.0 Enterprise Edition, which is aligned with XLPM and covers program management.*

## PREREQUISITES

Knowledge in Project Management. It is also recommended having knowledge in a project management model like XLPM (PROPS-C).
