

# Introducing SAFe 5.0 – Course

**4 hours**

## Introducing SAFe® 5.0

This four-hour course introduces the Scaled AgileFramework® (SAFe) to people who want to become part of the Lean-Agile transformation journey of their organizations.

Includes a SAFe 5.0 briefing with a description of the seven core competencies of the Lean Enterprise, case studies highlighting outcomes from organizations who have successfully implemented SAFe.

The competencies around customer centricity are: Lean-Agile leadership, Team and Technical agility, Agile product delivery, Enterprise Solution Delivery, Lean Portfolio Management, Organizational Agility and Continuous Learning Culture. Each core competencies of Business Agility has three dimensions.

## Learning Goals

Attendees should be able to:

- Understand what SAFe 5.0 is about
- Understand the Seven Core Competencies of Business Agility
- Make a decision about the SAFe capacitation roadmap

## What Attendees Get

The class registration includes:

- Attendee workbook
- White paper and brochure describing the seven core competencies of the Lean Enterprise
