

# SAFe – DevOps

**2 days – 16 hours**

**4 days – 16 hours (Virtual Classroom Training – VCT)**

## SAFE® DEVOPS

Delivering valuable solutions, faster, doesn't involve just engineers developing software. It involves introducing a shared DevOps mindset among all the people who define, build, test, deploy, and release software-driven products.

The SAFe® DevOps course helps people in technical, non-technical, and leadership roles optimize their development value stream from end to end. Take this course with the rest of your cross-functional team to map your current value stream from concept to cash. Design a Continuous Delivery Pipeline that's relevant to your business. And get the guidance and tools you need to work effectively in remote environments with distributed teams.

### **SAFe® DevOps answers the questions:**

- What is DevOps and how does it enable strategic business objectives?
- What are the mindset, culture, and technical practices to successfully define, build, test, deploy, and release?
- How do I use value stream mapping to measure flow and spot bottlenecks in the delivery pipeline?

### **Attendees learn:**

- How to incorporate continuous testing and continuous security into the delivery pipeline.
- How to integrate continuous exploration, integration, and deployment, and release value to end users on demand.
- How to design and implement an actionable DevOps transformation plan tailored to your organization.
- How to evaluate and improve your current state using tools like the DevOps Health Radar and Transformation Canvas.

**What's included:**

- Course materials
- Remote learning via SAFe® Virtual Classrooms
- Access to SAFe® Collaborate, a visual online workspace
- One-year membership to the SAFe® Community Platform
- Access to content, tools, and resources you need to practice SAFe every day
- SAFe DevOps certification exam

**Adapted for interactive remote learning with SAFe® Virtual Classrooms**
